

**Hitting a wall
discharging solidified
bulk material?**

**No problem with
BLOCK-BUSTER®
bulk bag conditioners**

*Contoured conditioning plates are
hydraulically driven to crush and loosen
solidified bulk material safely and easily*

**Bulk Bag Conditioner with
cantilevered I-beam, electric
hoist and trolley, eliminates
the need for a forklift**

**Stand-alone Bulk Bag
Conditioner with variable height
turntable allows conditioning on
all sides of the bag at all heights**

**Bulk Bag Conditioner with
variable height turntable
designed and constructed
to sanitary standards**

**Bulk Bag Conditioner integral
to Bulk Bag Discharger reduces
cost, footprint, and loading time
of separate equipment**

BLOCK-BUSTER® Hydraulic Bulk Bag Conditioners loosen bulk solid materials that have solidified during storage and shipment, such as hygroscopic chemicals, certain spice blends,

heat-sensitive products, and other materials that cannot be loosened by conventional flow promotion devices. Bulk bags can be raised, lowered and rotated to allow complete

conditioning of the entire bag through the use of automated turntables and scissor lifts, or electric hoist and trolley assemblies.

**Conditioning plates are offered
in standard and custom profiles
matched to specific materials
and bag designs.**
